We Want You!

We are always on the lookout for top minds entering the industry. We’re seeking recent graduates with bachelor’s and advanced degrees in science, business, software development, engineering, and other fields.

Science is at the core of everything we do. In fact, our scientists outnumber every other position at Opera Solutions. In addition, we have two chief operating officers — one who focuses on business operations and one who focuses on science. These two leaders ensure our business goals and scientific goals are always in sync.

You’ll find this parallelism echoed throughout the company, with each team consisting of its own dedicated scientist and business manager at the helm. Of course, we need more than scientists, too. Software developers, engineers, consultants, and project and product managers all help drive our solutions forward.

We also offer many opportunities in corporate departments such as HR, marketing, finance, and IT. Everyone at the company is encouraged to share ideas, offer insights, attend seminars, and participate in company challenges and events. This is because above all, we’re looking for people with big ideas. Opera Solutions thrives on innovation. With a flat structure and easy access to key decision makers, we strive to go from idea to reality as quickly and as often as possible.

Join Opera Solutions!

Opera Solutions is a global team focused on creating Big Data science solutions that help people achieve extraordinary results.

This is no simple feat. It requires individuals with top-notch skills and an unwavering passion for innovation. After all, we work on some of the world’s most complex business problems.

Our team members are entrepreneurs at heart. Whether they’re machine-learning scientists, consultants, or visionary software developers, they begin each day with a commitment to help build a growing company at the forefront of the Big Data revolution. We’re looking for trailblazers willing to share their big ideas while making the most of their unique talents.

Having started with only 10 people in 2004, we’re now a team of more than 450 employees worldwide. Each person has been handpicked for their dedication to excellence and their desire to conquer the unknown. It’s not for everyone. It’s for those who thrive on working with some of the best minds in the industry and stretching the boundaries of Big Data science.
Learn & Grow

The learning doesn’t stop just because you’ve graduated. In fact, we’d argue it’s only just begun. Opera Solutions offers many opportunities to learn new skills and be immersed in new industries during your tenure here. Our employees have the opportunity to learn new technical skills, such as SQL, Python, and Linux with on-the-job training.

Opera University is an active internal organization that provides seminars and Webinars to all employees, regardless of their position in the company. These events offer lessons in business, science, communications, and software. All sessions are recorded and made available to everyone, so you can take advantage of them from Day 1.

Solve the Business World’s Biggest Problems

We are problem solvers at heart, and nowhere is this more prevalent than in the day-to-day work we do with our Fortune 1000 clients. Whether we’re figuring out how to encourage Citi’s customers spend more on their credit cards or how to keep British Airways’ passengers loyal, we’re solving big problems for big companies and making a big impact on the bottom line.

We occasionally give our employees the opportunity to unleash all this brainpower on new ideas and innovations with the Opera Open, an internal competition that encourages all employees to form a team and present their ideas and concepts to a team of judges. The winning team receives a reward and — better yet — the chance to turn its idea into a real business solution.

We also frequently enter global analytics contests, such as the Expedia-sponsored Hotel Search contest, in which we took home first place. In it, teams were challenged to determine the best ranking of hotel search results based on likelihood to purchase.

No matter how big the business problem, we have a team of experts that can solve it.

Work with a Global Team

Throughout four continents, Opera Solutions occupies seven offices. The headquarters are located just across the river from Downtown Manhattan in Jersey City, NJ, but we also have large offices in New Delhi and Shanghai, San Diego, Boston, London, and Köflach, Austria make up additional offices.

Each team is made up of members from around the globe. While this makes for some late-night and early-morning calls, it also makes for an enriched work experience with opportunities to travel or even live in another country for a period of time.
